Exam Date	11/12/2024
Exam Time	9:00 AM - 11:00 AM
Subject	Stenographer Grade C and D Examination 2024

Section : **General Intelligence and Reasoning**

Q.1 दिए गए कथनों और निष्कर्षों को ध्यानपूर्वक पढ़ें। आपको दिए गए कथनों को सत्य मानना है, भले ही वे सर्वज्ञात तथ्यों से भिन्न प्रतीत होते हों। आपको तय करना है कि दिए गए निष्कर्षों में से कौन सा/से निष्कर्ष दिए गए कथनों का तार्किक रूप से अनुसरण करता/करते है/हैं।

कथन:

कुछ संज्ञा सर्वनाम हैं।

सभी सर्वनाम विशेषण हैं।

कोई विशेषण क्रिया-विशेषण नहीं है।

निष्कर्ष:

(I) : कोई सर्वनाम क्रिया विशेषण नहीं है।

(II) : कम से कम कुछ संज्ञा क्रिया-विशेषण हैं।

Ans

✗ 1. न तो निष्कर्ष (I) और न ही (II) अनुसरण करता है।

✗ 2. केवल निष्कर्ष (II) अनुसरण करता है।

✓ 3. केवल निष्कर्ष (I) अनुसरण करता है।

✗ 4. दोनों निष्कर्ष (I) और (II) अनुसरण करते हैं।

Q.2 कमलेश को एक बहुराष्ट्रीय कंपनी में काम करने का मौका मिला। कल उसके कार्यालय का पहला दिन है और उसने अपने साथी कर्मचारी से अपने नए कार्यालय का रास्ता पूछा। कमलेश टाउन A (उत्तर में) में रहता है और उसका कार्यालय टाउन F में है। उसके साथी कर्मचारी ने उसे फोन पर रास्ता बताया और उसने इसे एक कागज के टुकड़े पर नोट कर लिया। लिखित प्रतिलिपि नीचे है। प्रतिलिपि को ध्यान से पढ़ें और नीचे दिए गए प्रश्न का उत्तर दें।

'टाउन A से बाएं मुड़ें और 2 km चलें और आप टाउन B में होंगे। टाउन B से बाएं मुड़ें और टाउन C तक पहुंचने के लिए 3 km चलें। टाउन C से दाएं मुड़ें और टाउन D तक पहुंचने के लिए 4 km और चलें। टाउन D से दाएं मुड़ें और टाउन E तक पहुंचने के लिए 4 km चलें। टाउन E से बाएं मुड़ें और टाउन F तक पहुंचने के लिए 5 km चलें। कार्यालय टाउन F में है।'

टाउन E पहुँचने पर, कमलेश कल कितने किलोमीटर की दूरी तय कर चुका होगा?

Ans

Q.5 नीचे तीन कथन और उसके बाद तीन निष्कर्ष I, II और III दिए गए हैं। कथनों को सत्य मानते हुए, भले ही वे सामान्य रूप से ज्ञात तथ्यों से भिन्न प्रतीत होते हों, निर्धारित करें कि कौन-सा/से निष्कर्ष कथनों का तार्किक रूप से अनुसरण करता है/करते हैं।

कथन:

कोई आलू मिठाई नहीं है।

सभी आलू एवोकाडो हैं।

कुछ आलू ड्रैगन फ्रूट हैं।

निष्कर्ष:

I. कुछ एवोकाडो मिठाई नहीं हैं।

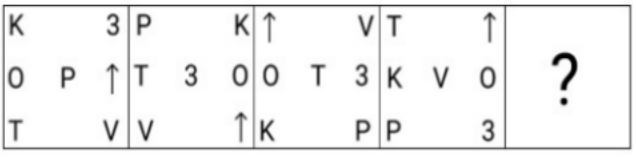

II. कुछ ड्रैगन फ्रूट मिठाई नहीं हैं।

III. कुछ एवोकाडो मिठाई हैं।

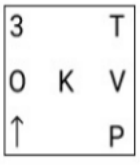

Ans
✔ 1. निष्कर्ष I और II दोनों अनुसरण करते हैं।
✗ 2. केवल निष्कर्ष III अनुसरण करता है।
✗ 3. निष्कर्ष II और III दोनों अनुसरण करते हैं।
✗ 4. सभी निष्कर्ष अनुसरण करते हैं।

AGRAWAL EXAMART

Comprehension:

Read the given passage carefully and answer the questions that follow.

The major factor in ensuring the safety of the food supply is food packaging. To ensure that food safety criteria are met, advances in food processing and packaging have dramatically increased. When food processing is finished, packaging preserves the benefits without having a negative impact on individuals who consume the food. Additionally, it enables food to be transported from the point of production to the point of consumption while maintaining its integrity despite the considerable distance. Additionally, it shields delicate foods from light, physical harm, and chemical changes as well as against microbial contamination of meals like meat.

In other cases, the packaging is a tool for business promotion in the food processing industries. The packages frequently brand the business or promote it in some way. Packages can occasionally improve a product's appearance and increase consumer appeal. To comply with rules, packaging technology must strike a compromise between a number of issues. These include the protection of food along with other factors including increased social and environmental awareness, the expense of energy and materials, rigorous limits on pollutants, and the removal of municipal solid waste.

Food packaging can be made from a variety of materials, some of which include foil, laminates, coated sheets, films, metals, plastics, conventional, and paper. Some of these things don't decay at all, while others degrade in varying degrees. The topic of environmental damage brought on by food packing materials is not new. Plastic and other items are virtually universally discarded, harming the ecosystem. Despite how important packaging is, it nevertheless poses a serious environmental risk.

The process of making packaging necessitates the use of natural resources, which results in the destruction of a variety of unintended animal habitats. Some businesses, like those that harvest trees, also don't allow the growth of many of the natural resources they use.

Because harmful fumes are released into the atmosphere during the manufacture of these packaging materials, the environment is also harmed. The air will become more contaminated if these processes aren't managed. Occasionally, these packaging wastes are carelessly disposed of, polluting the environment, and some of those wastes don't disintegrate at all.

Wood and paper are two prominent packaging materials made from forest resources. Uncontrolled, contentious exploitation of forest resources will upset the balance of the forests' growth. Erosion, desertification, water scarcities, and a host of ecological issues are just a few of the effects of an unbalanced growth rate. Non-biodegradable packing materials have long-lasting negative effects on the environment and can harm soil and other components through aquatic and atmospheric processes. This can lead to food insecurity, harm to other creatures, and damage to ecology and marine life. Improper disposal of packaging waste can be fatal to animals and impact spawning seasons, making pollution a serious concern. Food packaging has a negative impact on the environment, thus it's important to manage the trash properly to protect human health, the environment, and natural resources. Some of these methods include utilising less packaging, creating products with longer shelf lives, and repurposing goods and resources are all part of source reduction. By altering the appearance, acquisition, production, or usage of the originating material and products, source reduction also lowers the quantity and toxicity of the trash. Waste combustion is a controlled burning method used at specific facilities to dispose of non-recyclable materials. Waste-to-energy combustion incinerators use steam generators to produce heat for electricity generation. Composting is the controlled aerobic or biological decomposition of organic waste and is an effective waste disposal solution. This process involves placing organic debris in piles and providing sufficient moisture for decomposition by microorganisms.

SubQuestion No : 91

Q.91 Which of the following is an effect of unbalanced growth rate?

Ans

✗ 1. Composting

✗ 2. Aerobic decomposition

✗ 3. Recycling

✓ 4. Desertification

Comprehension:

Read the given passage carefully and answer the questions that follow.
The major factor in ensuring the safety of the food supply is food packaging. To ensure that food safety criteria are met, advances in food processing and packaging have dramatically increased. When food processing is finished, packaging preserves the benefits without having a negative impact on individuals who consume the food. Additionally, it enables food to be transported from the point of production to the point of consumption while maintaining its integrity despite the considerable distance. Additionally, it shields delicate foods from light, physical harm, and chemical changes as well as against microbial contamination of meals like meat.
In other cases, the packaging is a tool for business promotion in the food processing industries. The packages frequently brand the business or promote it in some way. Packages can occasionally improve a product's appearance and increase consumer appeal. To comply with rules, packaging technology must strike a compromise between a number of issues. These include the protection of food along with other factors including increased social and environmental awareness, the expense of energy and materials, rigorous limits on pollutants, and the removal of municipal solid waste.
Food packaging can be made from a variety of materials, some of which include foil, laminates, coated sheets, films, metals, plastics, conventional, and paper. Some of these things don't decay at all, while others degrade in varying degrees. The topic of environmental damage brought on by food packing materials is not new. Plastic and other items are virtually universally discarded, harming the ecosystem. Despite how important packaging is, it nevertheless poses a serious environmental risk.
The process of making packaging necessitates the use of natural resources, which results in the destruction of a variety of unintended animal habitats. Some businesses, like those that harvest trees, also don't allow the growth of many of the natural resources they use.
Because harmful fumes are released into the atmosphere during the manufacture of these packaging materials, the environment is also harmed. The air will become more contaminated if these processes aren't managed. Occasionally, these packaging wastes are carelessly disposed of, polluting the environment, and some of those wastes don't disintegrate at all.

A Fox, one day, fell into a deep well and could find no means of escape. Meanwhile, a Goat, overcome with thirst, came to the same well, and seeing the Fox, enquired the reason for which the fox was in the well. Concealing his sad plight under a merry guise, the Fox indulged in a lavish praise of the water, saying it was excellent beyond measure, and told the goat that he deliberately jumped in the well to enjoy its benefits. He kept encouraging the goat to jump in the well. The Goat, mindful only of his thirst, thoughtlessly jumped down, but just as he drank, the Fox informed him of the difficulty they were both in and suggested a scheme for their common escape. "If," said he, "you will place your forefeet upon the wall and bend your head, I will run up your back and escape, and will help you out afterwards." The Goat readily assented and the Fox leaped upon his back. Steadying himself with the Goat's horns, he safely reached the mouth of the well and made off as fast as he could. When the Goat upbraided him for breaking his promise, he turned around and cried out, "You foolish old fellow! If you had as many brains in your head as you have hairs in your beard, you would never have gone down before you had inspected the way up, nor have exposed yourself to dangers from which you had no means of escape."
